

Employment of persons with disabilities: Role of the public sector as an employer European perspectives

Research seminar – Programme

Paris, Maison des sciences sociales du handicap, September, 18th and 19th, 2014

This second research seminar aims at carrying on the discussions on the employment of persons with disabilities in the public sector started last year during a first seminar held in November 2013.

During this two-day seminar, we will look at the policies enforced by completing the picture for each country and by working on a comparative analysis. We will also discuss the issue of comparable statistical data as it was identified as a key point during the first seminar.

These seminars are part of a project whose objectives are to:

- Map, across European countries involved in the project, the situation of the employment of persons with disabilities in the public sector: looking at policies enforced and at statistical data.
- Share concrete and innovative solutions as well as best practices on the employment of people with disabilities in the public sector.
